

Brand : HERSILL  
Range; Anaesthesia  
Name : Genesis

Modular design for maintenance and service saving.

Suitable for very low flow anaesthetic techniques.

**Ventilation modes:**

- Volume or Pressure Controlled Ventilation (Controlled Mandatory Ventilation).
- Volume or Pressure Synchronized Intermittent Mandatory Ventilation.

Equipped with novel safety features:

- The Compact Anaesthesia Breathing System (CABS) is fully autoclavable.
- Detection and alarm, in the event of anaesthetic gas scavenging system failure.
